Skills

Strong: JavaScript, React, Redux, Node, Express, MongoDB, HTML5/CSS3, Git, Microsoft Suites

Experienced: Angular, Meteor, Sequelize, MySQL, Webpack, Backbone, jQuery, D3, TDD, Mocha/Chai, API Integration, Heroku, Grunt, Gulp, BookShelf, Bootstrap, C3

Projects

ComponentBase | Developer (<http://componentbase.herokuapp.com>)

A library of reusable React Components designed for personal site building

- Architected UX and UI using React for scalability
- Built reusable code snippet library of forms, drop down menus, progress bars, and other commonly used website components for easy user integration
- Wrote documentation for usage and open-source contributions

Heartbeat | FullStack Engineer | Scrum Master (<http://abvolt.herokuapp.com>)

A data visualization tool that brings awareness to global issues

- Led the development of frontend views using React and Redux components and containers
- Designed underlying logic that powers the D3 data visualization using Redux and MySQL
- Enabled data persistence through Sequelize and MySQL
- Provided real time representation of media attention by integrating news API's

Prsnl-2 | FullStack Engineer (<http://prsnl-2.herokuapp.com>)

An application that tracks communication with client base

- Created feature that allows user to edit events with Angular
- Updated database and graphs based on user edits with Node and Mongoose
- Enabled user to select timeframe that renders appropriate data with C3
- Integrated user authentication with Facebook and GitHub using Passport SDK

Experience

BuildTeem | Dev Team | Contract | March 2016 to Present

- Pushed code to production within a week of entering codebase
- Resolved fullstack routing bug in Meteor
- Handled tickets through JIRA
- Submitted work via code review and git workflow

Telegraph Academy | Hacker in Residence | March 2016 to June 2016

- Interviewed candidates for admissions
- Led mentoring and code review for incoming students
- Handled Help Desk requests from students, providing guidance in engineering best practices and debugging strategies

California Nurses Association, Oakland,CA | Data Analyst | 2007 - 2015

- Designed the architecture of a SQL reporting system project that optimized the accuracy and accountability of reports - improved accuracy from 35% to 80%
- Trained new employees on use of the database and internal systems
- Analyzed accounts with SQL Report Manager and Microsoft Access

Education

Telegraph Academy, Berkeley, CA, Advanced Software Engineering Immersive -2016

California State East Bay, Hayward, CA -2006

Personal

I'm a Bay Area native and lifelong A's Fan. When not coding you can find me at the gym as I am a fitness fanatic. I also never turn down the opportunity to practice my conversational spanish.
